

## Bonus Management

*Use your earned bonus points in an efficient way*

*Bonus Management gives you the possibility to efficiently use bonus points that have been earned according to the company's and the airline's travel policies.*

### **BONUS MANAGEMENT**

**Bonus Management makes it possible to order bonus tickets in Business Online in the same way that you order ordinary tickets.**

Being a member of a frequent traveler program gives a traveler the possibility to benefit from discounted airfares and other types of discount. Sometimes the possibility to use this discount is limited and it can be a challenge to the company to benefit from their earned bonus points.

#### **Easy ordering**

Many frequent traveler programs are integrated in Business Online and the traveler can see »free« tickets in the same display as all other tickets. This gives you a complete overview and you can easily compare fares and tickets including bonus ticket. The oldest points are always used first.

#### **Travel policy**

Depending on the airline's frequent traveler program and the company's travel policy, points may be allocated to an individual, to a group of persons or to the whole company. For information about a specific program we refer to the terms and conditions of each airline's frequent traveler program.

The company informs us about their travel policy and the bonus card numbers. We then assure that it is easy for you to use the discount that you are entitled to. Bonus Management can handle bonus points for air fares, however changes in the airline's management of bonus points can affect our possibilities to provide this service and we make sure we adapt Bonus Management as soon as possible.

- Efficient use of bonus points
- Easy administration for several persons
- Simple collection and update of information
- Good overview of the bonus point for everyone's benefit
- Bonus tickets may be booked in Business Online

### Savings in many ways

To keep track of bonus points and book bonus tickets you have to log into another system and this can be time consuming for the person booking tickets. By booking in Business Online you have everything in the same system and on the same screen. Thus there are savings to be made both regarding time, administration, and of course bonus points.

### Price

This service has a fixed price per year and per bonus card as indicated in the agreement, as well as a one time payment per booking.

The total price indicated at the time of booking consists of our booking fee and redeeming fee for payment of taxes which will differ according to the payment solution of your choice.

### General terms

We refer to our general terms, which are presented in the agreement.

### Example: price result screen with Flying Blue bonus tickets

The screenshot displays a flight booking interface with two main sections: '10 20OCT COPENHAGEN - AMSTERDAM' and '11 22OCT AMSTERDAM - COPENHAGEN'. Each section shows a table of flight options with columns for airline, departure/arrival times, and prices. A 'Price guideline per passenger' table is also visible, showing a total price of 1168.00. The 'Flying Blue' logo is highlighted in red circles.

Passenger	Price	Tax	Total Price	Visa
ADULT	346.00	823.00	1168.00	1168
